## Why pocket coil mattress?

Each independent barrel shaped spring is wrapped in a non-woven fabric, and each coil functions independently to provide the optimum firmness that is most suitable for proper support & posture.

- Urethane Foam 15mm, Coil thickness:1.9mm, Height: 180mm, Height wrapped in casing: 140mm
- Features numerous areas of firmer support to hold your body weight
- Creates an even distribution of weight to ensure a stable posture
- Reduces the amount of sinking

## Rotate your mattress to extend its lifespan

We recommend rotating your mattress 180 degrees every season, as the strength of the springs may deteriorate if weight is continuously applied to the same areas. By swapping the mattress orientation and distributing your body weight evenly over time, you can reduce the load on the springs. Make sure to also periodically air the mattress by standing it up for a brief time.
