## The main ingredient in skincare product is water.

The most abundant ingredient in toners, lotions and the base of skincare products is water. This is the main reason why MUJI emphasizes so much on “water quality”. MUJI’s quest for quality water brought them to natural water that springs from caves of Kamaishi, Iwate Prefecture in Japan. Rain and snow that falls over this area seeps down into the mountains and passes through the thick bed of rocks for many decades and gets filtered down to very fine water particles with very minimal impurities. The pH of water most suited to our skin is similar to the pH of our tears which is slightly alkaline. MUJI uses this ultra-soft water that can penetrate deep down to the sub-layer of our skin abundantly as an ingredient in its skincare products.

# Sensitive Skin Care

Simple low-stimulating hypoallergenic skin care for delicate and easily irritated skin. Uses natural hydrating ingredients that is gentle and effective for sensitive skin.
